Would recommend if you enjoyed the missions or multiplayer. Minorish add on to a solid game.. Nice short and simple game. Cool little indie title, apart from the ponies lol. But yeah everything went together nice, simple controls and a decent visual look to it, and it's FREE! So give it a go, and see what you think. Take note, this is nothing huge, just a nice little fun time killer game. Don't take it too seriously, and don't treat it like a triple a title. :D. I agree with another reviewer that this game is very short and easy. However, unlike that reviewer, I do recommend this game. I thought it was a beautiful aural and visual presentation, and I thoroughly enjoyed it. Sometimes you're in the mood for a fast-paced FPS, sometimes you're in the mood for a challenging puzzler, and sometimes you're in the mood for a nice, relaxing, stress-free experience. That's what this game is -- beautiful, relaxing, and stress-free. While it IS short (I do wish there were more levels to increase the playing time), games like this definitely have their place, and I'd say it's well worth it.. This was a great game, I wish there were more games like it. I started playing this at night before bed and the calming scenery helped me relax. i played back in 2011-2013. it was amazing. christmas 2018:

. WarGames is a FMV game created by Eko, a website dedicated to making interactive movies and shows, in conjunction with Sam Barlow, creator Her Story. It's a spiritual adaptation of the 1983 movie WarGames, which starred a pre-Bueller Matthew Broderick.

#WarGames updates the original movie's premise of Cold War era Mutually Assured Destruction to cyberwarfare, fake news, and the modern American military industrial complex. The protagonist is Kelly, a military brat and experienced hacker living in Alexandria, Virginia with her boyfriend, Rafiel. Kelly is a part of small group of hackers who she treats as close friends, though after her mother's death fighting overseas in Afghanistan she's gotten out of the hacking game for several months. She changes her mind after her mother is slandered as a traitor by a Fox News expy and she enlists her hacker pals to embarrass the news channel and show the truth. Eventually Kelly and Friends start making a name for themselves under #WarGames but as they get more involved in activist causes they may be starting to bite off more than they can chew...

Unlike Her Story, where you actively had to search for videos using keywords, #WarGames has the videos play out like a TV show would, though said videos are separated into different screens focusing on different characters or areas, you can fully view only one video screen at a time, the rest will be playing on around you in smaller, but still visible screens. The biggest thing that makes #WarGames a game is that it actually tracks what screens you are focusing on and changes how the story plays out

accordingly. The main plot beats are pretty much the same, but Kelly's personality, her relationships with other characters, and how events play out are all determinant on what you focus on. Just as an example of how many different ways things can resolve, I completed the game and I only got 38% of the achievements.

The writing is mostly quite good and the characters are mainly fun, though it does sometimes dive into "How do you do fellow kids?" territory which I felt fellow hacker activist game Watch_Dogs 2 managed to successfully avoid. The acting is also overall solid. Also as the title of today indicates this is pretty much Season 1 of the game, the ending is a cliffhanger, though not a total one, so keep that in mind going in. The only real complaint I have writing-wise is that it doesn't really dwell on its own themes as much as it should, sort of jumping around a little bit too quickly before it can really flesh them out, i.e. it brushes only a little with how truly heinous the right-wing propaganda machine is before moving on after the first act and even then its more couched in "They lied about Kelly's mom!" instead of "They're outright indoctrinating people with utter falsehoods." As a whole, #WarGames is a fine game with a good deal of further potential. Season 1 leaves you with some big possible decisions that hopefully get realized in Season 2.. This is exactly what it says, an experience. It has many flaws and will make you quite ill by the final rooms. BUT the level of detail and clear effort shine here. The VR really gives you that "being there" feel. Wall fixtures and beakers in the sink make you want to pick them up, I nearly let go of my controller to grab one. Trying to read the labels on pill jars, the stains on the sofa bed were...noticed. Strange machines on the walls with dials and strange elaborate pipes. It'll leave you wanting more.

While I wanted this to be totally awesome.. currently the way they have optimised the graphics and the control system.. it's basically a barf fest on the oculus rift. (I develop for VR myself so I have a vague idea :P). They'll tell you bardock is a simple and easy to use character, but really you have to think a lot

For example, will you lariat at round start? If they block, what assist will you use to cover your lariat? See he's actually a really complex character and-. Wow, one of the best racing games I have played in a long time. Still can't believe it was only £32.00, definitely a worthy purchase. This game has quality tracks and cars, the power-ups have been thoroughly thought through and are almost always different everytime. The soundtrack is definitely also one of my top favourite things about this amazing game! Simply cannot believe this great game.. Worth the price, especially if on sale.. Overly simplistic game. There is some room for optimising, but generally it's just a waiting game...
