Thankfully, Excel 2010 added macro support back, but like all macros the code generated is often bloated and relies heavily on the Selection object, which tends to hide the core objects in use.. On the downside, they didn't have time to incorporate AutoShape operations in their macro recorder prior to release.. For example, if the AutoShapeType value is -2, then for all practical purposes the shape is not an AutoShape. [Dragon Medical Practice Edition Download](#)
